

Aneng PT1028 22-in-1 1000V Professional Universal Multimeter Combination Test Lead Set

Features:

- 22-in-1 combination line, multifunctional combination line, and silicone wire test leads can replace parts and tools according to measurement needs
- U-shaped insert: As shown in the figure, it needs to be replaced according to the scene: the U-shaped fork is firmly stuck for measurement
- Alligator clip: The alligator clip fully wraps the insulated handle, effectively avoiding electric shock
- Injection sheath needle: Insulation injection-molded sheath meter head, can prevent arc running and avoid electric shock
- Gilded extra tip: Lengthened tip diameter is only 0.3mm, small space can also be measured
- Nickel-plated copper needle: Multifunctional combination line, faster and easier measurement
- Tapered Needle: Replace as needed as shown in the figure: It can measure the circuit components that are difficult to touch at the bottom of the circuit board
- Extended nickel-plated copper needle: For narrow and deep places that cause poor measurement, you can use an extended nickel-plated copper needle to measure
- Banana Plug: Banana plug can be connected to alligator clips/U-shaped inserts and other adapters
- Banana Tip: The banana tip can assist in connecting adapters such as alligator clips/U-shaped inserts, etc. Fixed socket measurement

Sequence	Accessory Name	Quantity	Sequence	Accessory Name	Quantity
①	Silicone wire test pen	2	⑥	Banana plug	2
②	Extended nickel-plated copper needle	2	⑦	Alligator clip	2
③	Nickel-plated copper needle	2	⑧	U-shaped insert	2
④	Tapered needle	2	⑨	Injection sheath needle	2
⑤	Banana tip	2	⑩	Gilded extra tip	4

22 IN ONE COMBINATION LINE

U-shaped insert

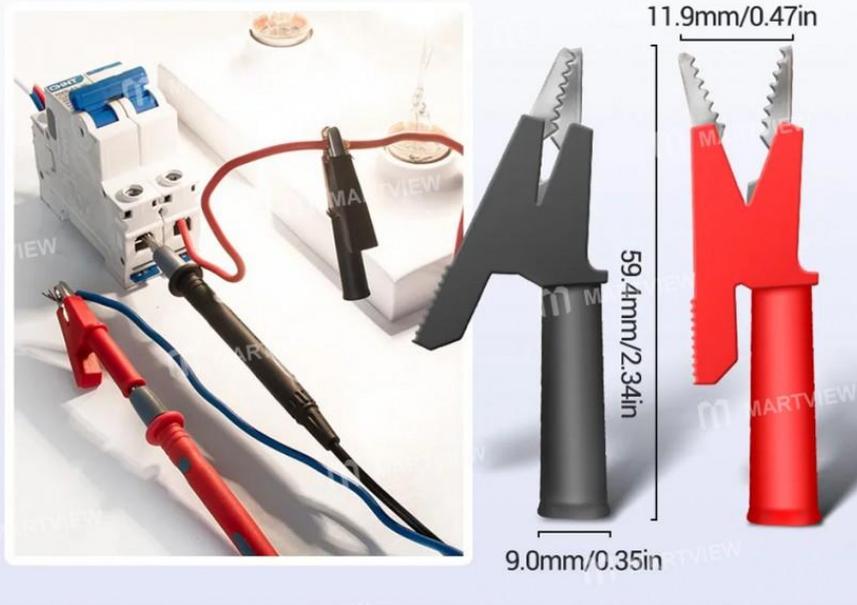

As shown in the figure, it needs to be replaced according to the scene: the U-shaped fork is firmly stuck for measurement

22 IN ONE COMBINATION LINE

Alligator clip

The alligator clip fully wraps the insulated handle, effectively avoiding electric shock

22 IN ONE COMBINATION LINE

Nickel-plated copper needle

Multifunctional combination line
Faster and easier measurement

22 IN ONE COMBINATION LINE

Injection sheath needle

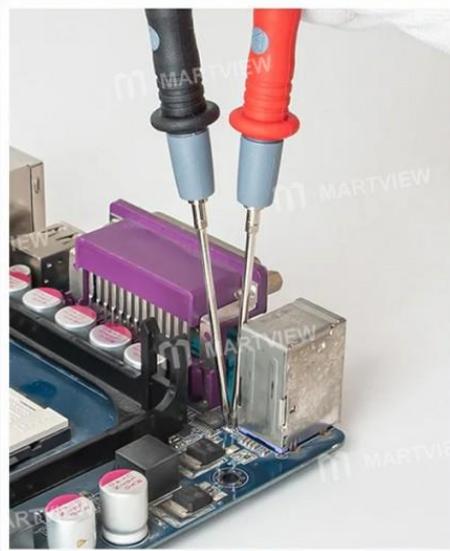

Insulation injection-molded sheath meter head, can prevent arc running and avoid electric shock

22 IN ONE COMBINATION LINE

Extended nickel-plated copper needle

For narrow and deep places that cause poor measurement, you can use an extended nickel-plated copper needle to measure

22 IN ONE COMBINATION LINE

Gilded extra tip

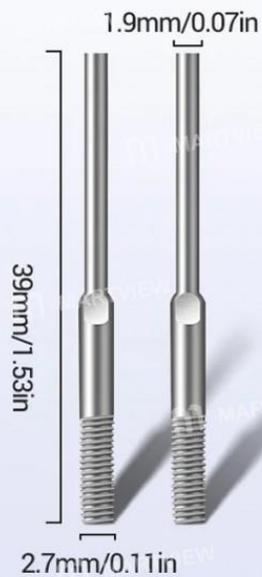

Lengthened tip diameter is only 0.3mm
Small space can also be measured

22 IN ONE COMBINATION LINE

Tapered Needle

Replace as needed as shown in the figure: It can measure the circuit components that are difficult to touch at the bottom of the circuit board.

22 IN ONE COMBINATION LINE

Banana Plug

Banana plug can be connected to alligator clips/U-shaped inserts and other adapters

22 IN ONE COMBINATION LINE

Banana Tip

The banana tip can assist in connecting adapters such as alligator clips/U-shaped inserts, etc. Fixed socket measurement
