3. Insert the waterproof glue into the waterproof head

4. Tighten the waterproof nut and complete the installation

- ① Waterproof nuts
- ② Waterproof apron
- ③ Waterproof connector
- ④ Waterproof gasket
- ⑤ Waterproof box

The 1Pcs RJ45 Docking Connector Ethernet Network Straight-through Waterproof IP67 Header Outdoor Broadband Network Cable Extender is a device that allows you to extend the reach of your Ethernet network cable by connecting it to another cable using an RJ45 connector. It is waterproof and has an IP67 rating, which means that it can withstand being submerged in up to 1 meter of water for up to 30 minutes. This makes it ideal for use in outdoor applications, such as connecting a security camera to a network.

The extender is also straight-through, which means that the data signals are not crossed over when they pass through the connector. This is important for some types of Ethernet networks, such as those that use Power over Ethernet (PoE).

Here are some of the benefits of using a 1Pcs RJ45 Docking Connector Ethernet Network Straight-through Waterproof IP67 Header Outdoor Broadband Network Cable Extender:

It can extend the reach of your Ethernet network cable.

It is waterproof and can withstand being submerged in up to 1 meter of water for up to 30 minutes.

It is straight-through, which means that the data signals are not crossed over when they pass through the connector.

It is easy to install and use.

If you need to extend the reach of your Ethernet network cable and you are looking for a waterproof and easy-to-use solution, then the 1Pcs RJ45 Docking Connector Ethernet Network Straight-through Waterproof IP67 Header Outdoor Broadband Network Cable Extender is a good option.
